Starting to brush early (by 3-4 months of age) is ideal to get your pet used to the routine. Easy step-by-step instructions included.

Day 1-3

Allow your pet to get used to sitting still while you gently lift the lip and run your finger along gums and teeth. Spend no more than 5 minutes. Reward well and give plenty of praise.

Day 3-5

Place a tiny amount of pet toothpaste along the gums on each side of the mouth. Allow your pet to lick and swallow the toothpaste. **Human toothpaste should never be used for your pet.** Do not brush at this point; the goal is to get your pet used to the paste first.

Day 5-7

Introduce the QuadBrush™ with a tiny amount of toothpaste and gently begin brushing.

Day 8+

Brush at least 2-3 times weekly, covering all areas of the mouth (not necessarily in one sitting).

Cleaning & Storage

QuadBrush™ should be rinsed, dried and placed in holder after every use to keep bristles clean and sanitary.

Toothbrush should be replaced every 3 months or at first sign of bristle wear.
